Chronic Lower Respiratory Disease .....	40.5
Accidents .....	39.8
Motor Vehicle Accidents .....	15.0
Alzheimer's Disease .....	22.6
Diabetes Mellitus .....	23.3
Influenza & Pneumonia .....	17.8
Intentional Self-Harm (suicide) .....	10.9
Chronic Liver Disease and Cirrhosis .....	8.8
Infant Mortality .....	6.69

#### Notes:

1 Only one year of U.S. data are given to compare with five years of state and county data because the numbers on the national level are much greater and do not fluctuate as much annually.

2 The U.S. percent of mothers receiving care in 1<sup>st</sup> trimester is based on 18 states that were using the 2003 standard birth certificate, including South Dakota.

3 Data for mothers who used tobacco while pregnant are self-reported. The U.S. percent of mothers who used tobacco is based on 17 states using the 2003 standard birth certificate, including South Dakota.

4 Teenage pregnancy rate is live births, fetal deaths, and abortions per 1,000 females age 15-17. The U.S. teenage pregnancy rate is from 2005.

5 The mortality rates, except infant mortality are age-adjusted death rates per 100,000 population. Age-adjusting to the standard million population eliminates differences between populations, making them easier to compare. Infant mortality is calculated as the number of infant (less than one year old) deaths per 1,000 live births.

\*\* Atherosclerotic Heart Disease I25.1 was not broken out in the national data; therefore no age-adjusted rate is displayed.

Source: National Center for Health Statistics, Centers for Disease Control and Prevention, U.S. Department of Health and Human Services, Hyattsville, Maryland.

# South Dakota

## Demographic Information

### 2000 Population Information

Population .....	754,844
Percent White .....	88.7%
Percent American Indian .....	9.0%
Percent Age 65 or Over .....	14.3%
Percent Age 4 or Under .....	6.8%

### Socioeconomic Indicators

Population Under 100% of Poverty .....	95,900
Percent of the Population .....	13.2%
Population Under 200% of Poverty .....	240,886
Percent of the Population .....	33.1%

<sup>1</sup>All rates based on population are calculated according to the 2000 U.S. Census.

<sup>2</sup>Data for mothers who used tobacco are self-reported.

<sup>3</sup>Teenage pregnancy rate is live births, fetal deaths, and abortions per 1,000 females age 15-17.

<sup>4</sup>All mortality rates except infant mortality are age-adjusted death rates per 100,000 population. Infant mortality is the number of infant (less than one year) deaths per 1,000 live births.

\*Due to lack of comparable data from all 50 states, significant differences cannot be calculated.

\*\*Atherosclerotic Heart Disease I25.1 was not broken out in the national data; therefore, significant differences cannot be calculated.
