Long Term Care in South Dakota

Nursing Homes and Assisted Living Centers

- Current Total of LTC Facilities with Case – 68*
- Cumulative Total LTC Facilities with Case – 211
- Cumulative Total Resident Active Cases – 314*
- Cumulative Total Resident Cases – 3,133
- Cumulative Total Resident Deaths – 713
- Total Active Cases in Staff – 135*
- Cumulative Total Case in Staff – 1,147
- Cumulative Total Staff Hospitalized – 29

*Self-reported by touch-base calls as of 1.5.2021 - all data is provisional
16.52 cases /1,000 residents

as of week of 12.20.20
7.59 deaths/1,000 residents

as of 12.20.20
We must all remain vigilant.
The Core Principles of COVID-19 Infection Prevention

The Core Principles of COVID-19 Infection Prevention

- **Screening** of all who enter the facility for signs and symptoms of COVID-19 (e.g., temperature checks, questions or observations about signs or symptoms), and denial of entry of those with signs or symptoms
- **Hand hygiene** (use of alcohol-based hand rub is preferred)
- **Face covering or mask** (covering mouth and nose)
- **Social distancing** at least six feet between persons
- **Instructional signage** throughout the facility and proper **visitor education** on COVID-19 signs and symptoms, infection control precautions, other applicable facility practices (e.g., use of face covering or mask, specified entries, exits and routes to designated areas, hand hygiene)
- **Cleaning and disinfecting** high frequency touched surfaces in the facility often, and designated visitation areas after each visit
- Appropriate use of **Personal Protective Equipment (PPE)**
- **Effective cohorting** of residents (e.g., separate areas dedicated COVID-19 care)
- **Resident and staff testing** are accessible

Summary for Healthcare Facilities: Strategies for Optimizing the Supply of N95 Respirators during Shortages

This summary is intended to help healthcare facilities optimize supplies of disposable N95 filtering facepiece respirators when there is limited supply during the COVID-19 pandemic. The strategies are categorized in a continuum of care and further organized according to the hierarchy of controls, as defined below.

Conventional Capacity Strategies (should be incorporated into everyday practices)

<table>
<thead>
<tr>
<th>Engineering Controls</th>
</tr>
</thead>
<tbody>
<tr>
<td>Place patients with suspected or confirmed SARS CoV-2 infection in an airborne infection isolation room (AIR) for aerosol generating procedures, if possible.</td>

All requests for PPE from DOH must be:

• Emailed to COVIDResourceRequests@state.sd.us,
• Faxed to 605.773.5942, or
• Called in to 605.773.3048 to ensure prioritization and coordination of requests.

• Do not duplicate your request by using all three means of communication.

• Any requests received through any other email or number will all be directed to email COVIDResourceRequests@state.sd.us OR call 605.773.3048 and requesting entities must provide information regarding their current facility status.

Frequently Asked Questions about COVID-19 Vaccination in Long-Term Care Facilities

Will residents still need to wear masks, and will HCP still need to wear personal protective equipment in the facility after receiving COVID-19 vaccination?

Yes. COVID-19 vaccines will be an important tool to help stop the pandemic. However, even after vaccination everyone should continue to follow all the current guidance to protect themselves and others. This includes wearing a mask, staying at least 6 feet away from others, avoiding crowds, following facility guidance on visitation and infection control, and clean hands often. CDC’s current recommendations will continue to be the primary way that LTCF residents and HCP are protected until vaccination is widespread.

Frequently Asked Questions about COVID-19 Vaccination in Long-Term Care Facilities

What are the COVID-19 testing requirements for pharmacy staff who are administering COVID-19 vaccine onsite at LTCFs?

All pharmacy partner staff participating in onsite LTCF vaccine clinics must follow CMS COVID-19 testing requirements for LTCF staff. Testing is to be done at the expense of the pharmacy partner.

https://www.cdc.gov/vaccines/covid-19/toolkits/long-term-care/faqs.html
Frequently Asked Questions about COVID-19 Vaccination in Long-Term Care Facilities

After LTCF HCP are vaccinated, should they continue regular COVID-19 testing?

Yes, facilities should continue to follow recommendations for COVID-19 testing in nursing homes. Experts need to understand more about the protection that COVID-19 vaccines provide before deciding to change recommendations on steps everyone should take to slow the spread of the virus that causes COVID-19.

COVID-19 vaccination will not influence the results of viral (nucleic acid or antigen) COVID-19 tests. Positive tests should not be attributed to the COVID-19 vaccine.

Post Vaccine Considerations for Healthcare Personnel
(12/14/2020)

• Vaccinated HCP should continue to follow all current infection prevention and control recommendations to protect themselves and others from SARS-CoV-2 infection.

• Positive viral (nucleic acid or antigen) tests for SARS-CoV-2, if performed, should not be attributed to the COVID-19 vaccine, as vaccination does not influence the results of these tests.
