Disease Impact – United States

as of 11.22.20

Resident Cases and Deaths

- TOTAL COVID-19 CONFIRMED CASES: 354,313
- TOTAL COVID-19 SUSPECTED CASES: 169,733
- TOTAL COVID-19 DEATHS: 72,642

Long Term Care in South Dakota

Nursing Homes and Assisted Living Centers

- Current Total of LTC with Case – 120*
- Cumulative Total LTC Facility with Case – 207
- Cumulative Total Resident Active Cases – 805*
- Cumulative Total Resident Cases – 2,691
- Cumulative Total Resident Deaths – 562
- Total Active Cases in Staff – 433*
- Cumulative Total Case in Staff – 1,080
- Cumulative Total Staff Hospitalized – 24

*self-reported by touch-base calls as of 12/07/2020 - all data is provisional
454.7 cases /1,000 residents

as of 11/22/20
107.1 deaths/1,000 residents

as of 11/22/20
Statewide data as of 12/08/20 – all cases reported

RT-PCR Test Positivity Rate: This rate is equal to the number of positive RT-PCR tests divided by total RT-PCR tests, within the specified period of time.

14-Day Trend of Positive Cases by Date Reported to SD-DOH

14-Day Trend of Positive Cases by Date Reported to SD-DOH: This graph shows the trend (increasing or decreasing) of COVID-19 positive cases (persons who meet the national surveillance case definition for COVID-19) at the state or county level.
The **Core Principles of COVID-19 Infection Prevention**

The **Core Principles of COVID-19 Infection Prevention**

- **Screening** of all who enter the facility for signs and symptoms of COVID-19 (e.g., temperature checks, questions or observations about signs or symptoms), and denial of entry of those with signs or symptoms
- **Hand hygiene** (use of alcohol-based hand rub is preferred)
- **Face covering or mask** (covering mouth and nose)
- **Social distancing** at least six feet between persons
- **Instructional signage** throughout the facility and proper **visitor education** on COVID19 signs and symptoms, infection control precautions, other applicable facility practices (e.g., use of face covering or mask, specified entries, exits and routes to designated areas, hand hygiene)
- **Cleaning and disinfecting** high frequency touched surfaces in the facility often, and designated visitation areas after each visit
- Appropriate use of **Personal Protective Equipment (PPE)**
- **Effective cohorting** of residents (e.g., separate areas dedicated COVID-19 care)
- **Resident and staff testing** are accessible
Resources for Long Term Care

Given how this situation is evolving, please refer to the CMS Quality, Safety & Oversight’s Coronavirus webpage [https://www.cms.gov/medicare/quality-safety-oversight-general-information/coronavirus](https://www.cms.gov/medicare/quality-safety-oversight-general-information/coronavirus),

In addition, the CMS Current Emergencies webpage for the most up to date information: [https://www.cms.gov/About-CMS/Agency-Information/Emergency/EPRO/Current-Emergencies/Current-Emergencies-page](https://www.cms.gov/About-CMS/Agency-Information/Emergency/EPRO/Current-Emergencies/Current-Emergencies-page).

We encourage all nursing homes to monitor the CDC website for information and resources, including the following site: “Preparing for COVID-19 in Nursing Homes” ([https://www.cdc.gov/coronavirus/2019-ncov/hcp/long-term-care.html](https://www.cdc.gov/coronavirus/2019-ncov/hcp/long-term-care.html)).
Resources for Long Term Care

Here is the link to the Nursing Home Resource Center: [https://www.cms.gov/nursing-homes](https://www.cms.gov/nursing-homes)

and the specific link to CMS training designed to help staff combat the spread of COVID-19 in nursing homes: [https://qsep.cms.gov/welcome.aspx](https://qsep.cms.gov/welcome.aspx)
All requests for PPE from DOH must be:

- Emailed to COVIDResourceRequests@state.sd.us,
- Faxed to 605.773.5942, or
- Called in to 605.773.3048 to ensure prioritization and coordination of requests.

- Do not duplicate your request by using all three means of communication.

- Any requests received through any other email or number will all be directed to email COVIDResourceRequests@state.sd.us OR call 605.773.3048 and requesting entities must provide information regarding their current facility status.
Holiday Visitation – During COVID-19 Pandemic

- Focus efforts on encouraging families to keep residents safe during the holidays.
- Educate families on the risk of taking loved ones out of the facility.
- Determine other ways to conduct visitation – virtual, not the same but may keep the resident safe.
- Follow facility policy for visitation to include holiday timeframes.
- Upon the resident’s return place them on observation as if a new admit.
  - The resident is not cohorted with positive or suspected COVID cases.
  - The resident is placed in observation and monitored for COVID signs and symptoms.

*With the exception of Memo 20-39, the above are recommendations voiced by CMS. These are not requirements/rules/regulations and are not in writing.*
CDC Quarantine Options – 12/2/20

These options do not apply to residents of staff in Nursing Homes or Assisted Living Centers.

Updated Guidance on Antigen Testing for SARS-CoV-2 (12/5/2020)

Summary of Recent Changes

Revisions were made on December 5, 2020 including:

- The word “rapid” has been deleted because FDA has authorized laboratory-based antigen tests.
- New section on processing of antigen tests, reflecting what has been learned on how to minimize the risk of false results.
- Revised section on evaluating the results of antigen tests, introducing a new testing algorithm, and reflecting what has been learned about the performance of antigen tests and the need to implement confirmatory testing.

Updated Guidance on Cleaning and Disinfecting Environmental Surfaces

• How are environmental surfaces involved in the transmission of infections?
• How does one interrupt transmission of pathogens from environmental surfaces?
• Where can I find detailed information on cleaning and disinfection?
• Why is cleaning of surfaces important?
• What detergents are used for outline environmental cleaning in healthcare settings?
• Are there ways to audit the cleaning process?
• What are no-touch devices or NTDs?
• What information if available about the use of electrostatic sprayers or foggers for the disinfection of rooms and surfaces in healthcare environments?
• Is ultraviolet germicidal irradiation (UVGI) recommended for disinfection of air and surfaces in the healthcare setting?

Cleaning and disinfecting environmental surfaces CDC website FAQ: https://www.cdc.gov/coronavirus/2019-ncov/hcp/faq.html
Considerations to Improve Ventilation

Consider ventilation system upgrades or improvements and other steps to increase the delivery of clean air and dilute potential contaminants. Obtain consultation from experienced Heating, Ventilation and Air Conditioning (HVAC) professionals when considering changes to HVAC systems and equipment. Some of the recommendations below are based on Guidance for Building Operations During the COVID-19 Pandemic from the American Society of Heating, Refrigerating, and Air-Conditioning Engineers (ASHRAE). In addition to buildings, ventilation considerations are also important when you have multiple persons within vehicles, including public transportation (buses, subways, trains, school buses, carpools, and rideshares). Not all considerations are applicable for all scenarios.
