PPE Requests:

Julie Smithson—Primary contact Julie.Smithson@state.sd.us

- Email: COVIDResourceRequests@state.sd.us
- Fax: 605.773.5942
- Phone: 605-773-3048
Professionalism during a pandemic

- Temperature Checks
  - For on call staff; if symptomatic, contact your PCP
- Masking on every call
- Protect yourself and your patients as if they have COVID-19

Workforce Health:

- [Handling COVID-19 Anxiety and Stress](#)
- [SD 211 Call Center](#) and SDML work
- [Self Isolation Guidance](#) (for self and family)
Infection Control in EMS

Kipp Stahl, BSN, RN  
Kipp.stahl@state.sd.us  
Healthcare-Associated Infections & AR Program Coordinator

Updated Guidance on Cleaning and Disinfecting Environmental Surfaces

• How are environmental surfaces involved in the transmission of infections?
• How does one interrupt transmission of pathogens from environmental surfaces?
• Where can I find detailed information on cleaning and disinfection?
• Why is cleaning of surfaces important?
• What detergents are used for outline environmental cleaning in healthcare settings?
• Are there ways to audit the cleaning process?
• What are no-touch devices or NTDs?
• What information if available about the use of electrostatic sprayers or foggers for the disinfection of rooms and surfaces in healthcare environments?
• Is ultraviolet germicidal irradiation (UVGI) recommended for disinfection of air and surfaces in the healthcare setting?

Safe PPE use & resources from NETEC:

Is that Hand Sanitizer Safe?

With an influx of hand sanitizers on the market, make sure you are using a product that has been evaluated by the FDA for safety and efficacy. Some sanitizers have been found to have:

- Contamination with potentially toxic types of alcohol
- Not enough active ingredient (ethyl alcohol or isopropyl alcohol)
- Labels with false, misleading, or unproven claims

Some hand sanitizers have been recalled and there are more than 150 hand sanitizers the FDA recommends you stop using right away.

Check the FDA’s Do-Not-Use List
