What should I do if I've been in close contact with someone...

...who has tested positive for COVID-19

...who is being tested?

...who might have been exposed...

...and IS experiencing symptoms?

...but is NOT experiencing any symptoms (yet)?

Self-quarantine

Self-monitor

Practice social distancing

HOW DO I...

Self-Quarantine

- Stay home for 14 days.
- Avoid contact with other people.
- Don’t share household items.

Self-Monitor

- Be alert for symptoms of COVID-19, including a cough, shortness of breath/difficulty breathing, fever, chills, repeated shaking, muscle pain, headache, sore throat, or loss of taste or smell.
- Take your temperature every morning and night and write it down.
- Call your doctor if you have trouble breathing or a fever (100.4°F/38°C).
- Don’t seek medical treatment without calling first!

Practice Social Distancing

- Stay home as much as possible.
- Don’t physically get close to people. Try to stay 6 feet away.
- Don’t hug or shake hands.
- Avoid groups of people.
- Be aware of frequently touched surfaces, including doorknobs, elevator buttons, service counters, shared pens, touch screens, steering wheels, and cell phones.

WHAT IF I HAVE SYMPTOMS? Call your healthcare provider.
