Monitor symptoms and seek medical attention if symptoms worsen. If you are at an increased risk of becoming very sick, treatment may be available. Contact your healthcare provider right away if you test positive. Treatment must be started within the first few days to be effective.

When using a COVID-19 self-test, follow instructions carefully.

If your results are positive

Isolate yourself from others. As much as possible, stay in a specific room and away from other people and pets in your home.

Tell your close contacts that they may have been exposed to COVID-19.

A positive test result on an at-home COVID-19 test does NOT need to be confirmed by a medical provider or reported to the SD DOH.
