CONTACT TRACING: helps to find people exposed to a positive case of COVID-19 so they can be quarantined to stop further spread.

CLOSE CONTACT: six feet or less for more than fifteen minutes at a time

ISOLATION: separates sick people with a contagious disease from people who are not sick.

SELF-QUARANTINE: separates and restricts the movement of people who were exposed to a contagious disease to see if they become sick.

WHAT TO EXPECT IF YOU’VE HAD CLOSE CONTACT WITH A POSITIVE CASE

Person tests positive for COVID-19 → Phone interview:
- Determine date of first symptoms and go back 2 days (48 hours)
- Identify everyone in close contact with positive person since that date
- Isolation for 10 days

After 14 days:
- Text messages stop

Enroll close contacts in text message system for 14 days from date of exposure.

Close contacts will receive a daily text asking if they have symptoms:
- If yes, they get a call with instructions to self-isolate
- If no, daily text messages continue
- Spanish translation available

Instruct 14 days of self-quarantine from date of close contact exposure.

Phone interviews with close contacts → Answer the CALL to slow the spread of COVID-19
