- **Phase 1 – 2<sup>nd</sup> dose prep**
  - **PATIENT DETAIL REPORT**

- A comprehensive, alphabetical list of vaccine recipients is created, including date of birth, vaccination date, vaccine name, and name of vaccinator (provider).
- **NOTE:** The PATIENT DETAIL report can be used as a tool to cross-reference your own records. It does not forecast the due date for the next shot in the series. Other reports may be useful in later phases of the COVID-19 vaccination program; however, these are dependent on a facility’s established patient list in SDIIS and are not useful in Phase 1.

## • *Special Situation*

- This is a somewhat rare situation in which a patient seemingly received two COVID shots.
- WHAT HAPPENED?!?!?
  - Patient received a dose of Pfizer COVID-19 vaccine administered by a pharmacy.
    - According to the pharmacist, the actual vaccination date was 12/30/20.
  - Pharmacy reported dose administered to primary care provider.

RECOMMEND

- **Special Situation**

- WHAT HAPPENED?!?!? (cont.)
  - PCP staff entered historical COVID dose into electronic medical record system with reported date 12/30/20.
  - HL7 interface did not recognize a matching existing dose, so it added a new dose.
    - In this case the dose added by clinic staff was not the correct brand, creating a duplicate that does not match

## • *Special Situation*

- WHAT HAPPENED?!?!? (cont.)
  - Pharmacy staff did not enter the vaccine dose until the following day, 12/31/20, and did not change the actual vaccination date of the dose.
  - COVID-19-PFI interfaced into patient's SDIIS record, adding to the inaccurate dose that had been previously uploaded.
- Moral of the Story:
  - Pharmacy: enter shots into your system as soon as possible, before reporting to PCP
  - PCP staff: check SDIIS to ensure the shot is there. If your historical entry matches the existing shot, your interface will not overwrite the existing shot. Also, use your reconciliation feature rather than add the shot manually.

## • Reminders

- SDIIS Trainings, included on education webpage: <https://doh.sd.gov/COVID/Vaccine/Providers.aspx>
- Staff should be trained in the Immunization Information System (IIS) for the tasks they will perform. The following trainings are available for new users and serve as a review for skilled users. Data Entry staff, whether vaccinators or ancillary staff, should view, at minimum, Trainings 1, 2, and 3. Staff tasked with Data Entry and Inventory Management, e.g. Vaccine Coordinators, should view all SDIIS trainings.
- User Application (at left) – submit now for anticipate users in later phases
  - Login and Settings (updated 12/02/20)
  - Search for Patients and Edit Information (updated 12/28/20)
  - Give Vaccine (updated 12/21/20)
  - Ordering and Receiving (updated 12/21/20)
  - Inventory Management (updated 12/28/20)

# Vaccine Finders

- Registration Onboarding from:
- [vaccinefinder@auth.castlighthealth.com](mailto:vaccinefinder@auth.castlighthealth.com)
- Check SPAM / junk mail folder for VF registration email
- If you are receiving vaccines *within the next 2 weeks* or have received vaccine and have **not** received a registration email, please contact [eocevent522@cdc.gov](mailto:eocevent522@cdc.gov). or contact me

# Vaccine Finder

**Provider registration email:** When a provider is placed on list for onboarding initial VF registration email will go to organizational contact listed in **Section A** of the Provider Agreement that was previously filed with your jurisdiction.

- Please note that approval to receive vaccine by a state system does not automatically place a provider in the queue for onboarding to VaccineFinder.
- They are only automatically onboarding providers that order through VTrckS. So, any provider getting re-distributed vaccine will need to be sent to us.
