

Sanford Health – EMS Outreach

South Dakota Monthly EMS Education Program

Contact 605-328-6389 for more details or email EMSServices@sanfordhealth.org

Sanford Health would like to present a sustaining continuing education model for fulfilling both the South Dakota Department of Health and the National Registry of EMT's NCCP (**National Continued Competency Program**) education requirements. This program will provide learners with the convenience and ease of maintaining EMS continuing education from within their community and home. This model builds upon the existing platform that has served EMS agencies in South Dakota for over 20 years. Learners will now utilize modern technology and video communication to achieve educational needs through live video broadcasts and interactive online learning.

As a commitment to sustain the ongoing demands for EMS continuing education, Sanford Health will be delivering live monthly education to EMS agencies through video broadcast sessions multiple times each month. Each monthly broadcast will be recorded for learner playback at a later date and time if needed. Video playback provides learners the ability to fulfill educational requirements if they are unable to attend a live session in their community. EMS agencies will have the ability to adjust the date of their live video broadcast if needed. Broadcasts will occur four times each week (Monday–Thursday) at designated times.

Each individual learner account will have access to multiple education modules that match NCCP requirements through the use of recorded video, interactive learning modules or self-paced programs. Individual education records are now available online to display completed courses and course options. Learners are able to upload external courses and classes to their education log for a cumulative record demonstrating their educational accomplishments.

Individual membership to the education program is coordinated through local EMS agencies across South Dakota. The individual membership fee is \$100 per year for over 30 hours of continuing education and online record management. This accounts for a fee of less than \$10 per month for a convenient and viable option to maintain EMS education requirements from the ease of your community and home.

Education Plan covering the NCCP requirements for South Dakota EMS and National Registry of EMT's

A dedicated educational commitment to the needs of EMS providers in the State of South Dakota

Ten	Monthly Live broadcasts – 2hrs each session
	4 hours Airway, Respiration, Ventilation
	7 hours Medical
	3 hours Trauma
