

Every Baby Deserves the Chance to BLOOM

NEWBORN SCREENING CAN MAKE A LIFELONG DIFFERENCE

SD BLOOM (*Babies' Lifelong Outcomes & Optimal Monitoring*), South Dakota's Newborn Screening Surveillance System, helps babies thrive by making sure important health needs identified through newborn screening lead to timely follow-up, care, and support.

EARLY SCREENING. TIMELY ACTION. HEALTHIER FUTURES.

SD BLOOM helps:

- Monitor newborn screening, diagnosis and long-term outcomes
- Support timely follow-up and connection to services
- Coordinate information across programs to strengthen care
- Improve newborn health outcomes across South Dakota

Early detection can prevent serious illness, disability and even death. By turning newborn screening information into meaningful action, **SD BLOOM helps give every baby the healthiest possible start in life and the opportunity to bloom.**
