ELITE™ ADD-ON FEATURES

FOR DIRECT ENTRY IN STATE OF SOUTH DAKOTA ELITE

The additional options outlined here are applicable only to agencies who choose direct data entry on the South Dakota Elite site; these are features that can be added on for an additional cost to the direct data entry option.

ImageTrend Elite™ Field

Complete documentation with or without an internet connection in the field. Medics can start and complete documentation of an encounter offline and submit the report when a connection is restored. Favorite features of Elite Field: EKG data import including seamless integration with LifePak 15 and other cardiac monitors, tools to simplify repetitive documentation, Timeline™ patient view and billing information collected on-scene.

CAD Integration

Shave time off your documentation effort by integrating with your CAD data. Timestamp when specific events occur and send that information directly to the patient record, while only populating the data and fields that your agency chooses.

Automated Billing Export

A NEMSIS file may be automatically exported to an agency's or biller's location based on specific criteria being met (i.e. incident status is 'Ready for Billing' or locked, etc.).

Direct Messaging/HIH™ Integration

In regions where Image Trend Hospital Hub™ has not been implemented, agencies with Direct Messaging can automatically send completed ePCRs to the destination hospital's fax number or EHR. For more information about Direct Messaging and Health Information Hub™, contact us.

Agency Level Validation Rules

Create agency specific validation rules on top of stateand national requirements based on the data that's most important to your agency.

Elite Community Health™

Manage and chart your MIH patient visits with Elite's Community Health module that uses one patient-centric record between your 911 and MIH services.
