WHAT YOU CAN'T SEE

Module 1
Know the Risks

"Germs can live in places we may not expect."

Germs can live on people, surfaces, equipment, and in the environment.

Some places make it easier for certain germs to survive.

Germs can move when people, hands, equipment, or objects move.

A surface does not have to look dirty to have germs on it.

Recognizing where germs may be is the first step.

MODULE 01 — Know the Risks

WATCH

Recognizing Risks in Healthcare

As you watch the video, where could germs be and where could they go next. How do you prevent their spread?

Click here:

https://www.youtube.com/watch?v=DTaelg1Ogb0

Now you can look at the room differently.

Germs are not always where you expect them- and you can't always see them.
