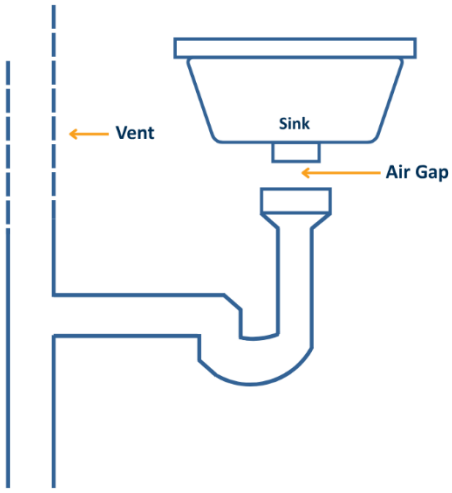
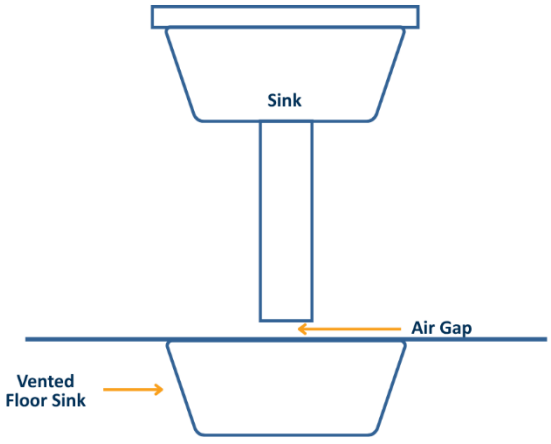
PREP SINK WITH AIR BREAKS

*Prep Sink Without Garbage Disposable



*Prep Sink With Floor Sink



In cases of space limitation or structural design within the foodservice establishment, a foodservice establishment may request a variance from the regulatory authority to utilize the third compartment of the three compartments sink as a prep/vegetable sink. The sink must be plumbed with an air gap on the drain line.

Each request for variance will be addressed on a case-by-case basis. A written notification from the regulatory authority granting the variance will be sent to the applicant.
