Definitions from F609

- “Abuse,” is defined at §483.5 as “the willful infliction of injury, unreasonable confinement, intimidation, or punishment with resulting physical harm, pain or mental anguish. Abuse also includes the deprivation by an individual, including a caretaker, of goods or services that are necessary to attain or maintain physical, mental, and psychosocial well-being. Instances of abuse of all residents, irrespective of any mental or physical condition, cause physical harm, pain or mental anguish. It includes verbal abuse, sexual abuse, physical abuse, and mental abuse including abuse facilitated or enabled through the use of technology.”
- “Alleged violation” is a situation or occurrence that is observed or reported by staff, resident, relative, visitor, another health care provider, or others but has not yet been investigated and, if verified, could be noncompliance with the Federal requirements related to mistreatment, exploitation, neglect, or abuse, including injuries of unknown source, and misappropriation of resident property.
- “Exploitation,” as defined at §483.5, means “taking advantage of a resident for personal gain, through the use of manipulation, intimidation, threats, or coercion.”

Definitions from F609

- “Exploitation,” as defined at §483.5, means “taking advantage of a resident for personal gain, through the use of manipulation, intimidation, threats, or coercion.”
- “Injuries of unknown source” – An injury should be classified as an “injury of unknown source” when all of the following criteria are met:
 - The source of the injury was not observed by any person; and
 - The source of the injury could not be explained by the resident; and
 - The injury is suspicious because of the extent of the injury or the location of the injury (e.g., the injury is located in an area not generally vulnerable to trauma) or the number of injuries observed at one particular point in time or the incidence of injuries over time.
- “Misappropriation of resident property,” as defined at §483.5, means “the deliberate misplacement, exploitation, or wrongful, temporary, or permanent use of a resident’s belongings or money without the resident’s consent.”

Definitions from F609

- “Mistreatment,” as defined at §483.5, is “inappropriate treatment or exploitation of a resident.”
- “Neglect,” as defined at §483.5, means “the failure of the facility, its employees or service providers to provide goods and services to a resident that are necessary to avoid physical harm, pain, mental anguish or emotional distress.”
- “Serious bodily injury” is defined in section 2011(19) of the Act and means an injury involving extreme physical pain, substantial risk of death, protracted loss or impairment of the function of a bodily member, organ, or mental faculty, or requiring medical intervention such as surgery, hospitalization, or physical rehabilitation (see section 2011(19)(A) of the Act). Serious bodily injury is considered to have occurred when an injury results from criminal sexual abuse (see section 2011(19)(B) of the Act).
- “Willful,” is defined at §483.5 in the definition of “abuse,” and “means the individual must have acted deliberately, not that the individual must have intended to inflict injury or harm.”

For additional reporting guidance DOH recommends review of the following topics within F609:

- **Staff to resident abuse**
- **Resident to resident altercations**
 - Includes sections on verbal conflicts, sexual contact, and physical altercations
- **Reporting Suspicious Injuries of Unknown Source**
 - Includes multiple examples of what is required or not required to be reported
 - Required reporting examples frequently involves “unobserved/unexplained...”
 - Note – Even if the injury is not one that requires a report, the facility should adequately assess and monitor the resident, notify the physician/resident representative as appropriate, and document the injury and investigation as a part of the resident’s medical record.
