S 000	Compliance Statement A licensure survey for compliance with the Administrative Rules of South Dakota, Article 44:70, Assisted Living Centers, requirements for assisted living centers, was conducted from 8/4/26 through 8/6/26. Johnson Center Of Sun Dial Manor was found not in compliance with the following requirement: S330.	S 000		
S 330	44:70:04:10 Tuberculin Screening... Requirements Each facility shall develop criteria to screen healthcare personnel and residents for Mycobacterium tuberculosis (TB) based on the Tuberculosis Screening, Testing, and Treatment of U.S. Health Care Personnel: Recommendations from the National Tuberculosis Controllers Association and CDC, 2019. Each facility shall establish policies and procedures for conducting TB risk assessment that include the key components of responsibility, surveillance, and containment. The frequency of repeat screening depends upon annual facility risk assessment results. Any resident identified as asymptomatic upon admission as short stay or anticipated stay of thirty days or less is not required to have a tuberculin skin test or a TB blood assay test. This Administrative Rule of South Dakota is not met as evidenced by: Based on interview, record review, and policy review, the provider failed to ensure the annual tuberculosis (TB) risk assessment was completed for the facility. Findings include: 1. On 8/4/26 at 10:05 a.m. this surveyor	S 330	The facility's annual Tuberculosis (TB) risk assessment was completed immediately in accordance with the CDC/National Tuberculosis Controllers Association 2019 guidelines. The Director of Nursing has reviewed and updated the Tuberculosis policies and procedures to include the addition of the annual TB risk assessment. The facility has determined that all have the ability to be affected by this deficiency. The Director of Nursing provided education to the Administrator and Assistant Administrator on 8-12-26. The education included the revised policy and review of the current annual assessment. The Director of Nursing or designee will be responsible for ensuring the TB risk Assessment is completed annually, documented appropriately, and used to guide ongoing TB screening, surveillance, and infection control practices. The Director of Nursing or designee will verify completion of the annual TB risk assessment each January and document the review for the next 23 months and continue audits annually until the facility demonstrates sustained compliance as determined by the QAPI committee.	8-12-26

S 330	Continued From page 1 presented administrator A with a list of requested documents which included the facility's annual TB risk assessment. 2. Interview and record review on 8/4/26 at 3:10 p.m. with director of nursing (DON) B revealed she had started as the DON about a month ago. She was not aware of the requirement for the completion of an annual TB risk assessment. She had a binder in her office labeled TB. Inside the binder was a completed South Dakota Department of Health TB Risk Assessment dated 8/2/23. She confirmed that was the most recent completed TB risk assessment. 3. Interview on 8/5/26 at 3:15 p.m. with administrator A revealed that she was not aware the annual TB Risk Assessment was not completed. She expected the TB Risk Assessment to be completed on an annual basis. 4. Review of the provider's October 2024 Tuberculosis policy revealed, "Purpose: To establish a standardized procedure for the screening, identification, and management of tuberculosis (TB) in residents and staff [at] Sun Dial Manor, ensuring compliance with public health regulations and guidelines."
