WHAT YOU CAN'T SEE

Module 3
What's in the bottle?

“Labels tell you important information that you need to know.”

All cleaning products used in a healthcare setting should have a healthcare-grade label and be listed by the Environmental Protection Agency (EPA).

- **All chemicals used must have a label.**
- **Always follow the directions for use.**
- **Review safety and first aid information**
- **Note storage instructions.**
- **Know what personal protective equipment is necessary before using.**

MODULE 03 — WATCH- Reading a Label

WATCH

Reading a Label

As you watch, listen for what the label tells you about use, safety, dilution or ready-to-use products, and contact time.

KNOWLEDGE CHECK — MODULE 03

1. **Where should you look for the contact time ?**

   The product label or instructions for use.

2. **Why does correct dilution matter?**

   The product must be use as directed to kill germs.

3. **What is contact time?**

   The time a product must stay on a surface to kill germs.

Read the label. Use it correctly.

MODULE 3- WHAT'S IN THE BOTTLE

THE LABEL IS PART OF THE PROCESS.

** Right product.*
** Right use.*
** Right contact time.*
** Prevent cross-contamination*

UP NEXT

LOOKS CLEAN. IS IT?

Let's put the product and the process together.
Cleaning and Disinfection

Thank you for watching.
