

# Car Seat Toolkit

## User Manual

---

As parents, protecting our children should be our main priority, especially when we're driving. As kids grow, how they sit in vehicles changes. And one of the best ways to ensure safety, is having a complete understanding of the proper ages and heights to utilize car seats.

Statistics show that three out of four children are not as secure as they should be in a vehicle, and toolkit can help change that. Its contents will not only inform others how to properly use a car seat, but also help instill good behaviors in kids at an early age. With your help distributing these toolkit materials, we can spread the word and keep our children protected.

### **Toolkit Includes:**

- Educational infographics
- Wall clings for home or office
- Stickers
- Fun activity sheets
