

"Quick-Guide"

Motorola XTL-1500

How to change "Channels" \updownarrow "within a Zone"

- Turn the "Channel" knob to change "Channels" up or down

How to change "Zones" \leftrightarrow

- Push the orange "Zone" button (the Zone # will advance to the next Zone)

How to use the "Scanner" Functions

Step 1 – Select Channels to be Scanned (Scan List)

- Push the "PROG" (Program) button...
- Push the "SCAN" button... (a "flashing" appears in the left corner)
- Go to the "Channel" you want to add or delete.
- Push the "SEL" (Select) ... a "Z" symbol will appear over the channel ...
Note: to remove a channel from the scan list..... just press the "DEL" (Delete) button and the "Z" disappears (meaning it is not on the "Scan List")
- Go to the next channel you want to scan and press the "SEL" button
Note: to When you are done with your scanner list....you can review your list by keep pressing the RCL (Recall) button to review your choices, all channels selected for being on the Scan List will appear with a little "Z" above them
- When your done....just press the "EXIT" button (the "flashing" disappears)

Black – digital channels

Red – analog (Non-digital) channels

SP OP 1 - (monitored 24/7)

Standard Dept. of Health Radio "base" Template
 Your "actual" radio template may include additional local "Zones & Channels"

Step 2 – Turning the Radio Scanner On & Off

- To turn the Scanner Onpush the "SCAN" button (a "Z" will appear indicating the scanner is on)
- To turn the Scanner Offpush the "SCAN" button (the "Z" will disappear indicating the scanner is off)

Scanner Tips:

- Scan Lists can hold up to "10" channels.
- Scanner can include any "channel" regardless of Zone, digital or analog.
- You have a few seconds to talk directly to a channel that pops up on your scanner, before it reverts back to scanning channels again.
