Your Baby's HEARING

APPROXIMATELY 3 OUT OF EVERY 1,000 INFANTS are BORN with HEARING LOSS

1 MONTH
All infants should have their hearing screened no later than ONE month of age

3 MONTHS
All infants who don’t pass the initial screening should receive a diagnosis no later than THREE months of age

6 MONTHS
All infants identified with hearing loss should receive early intervention services no later than SIX months of age

IF YOU HAVE ANY CONCERNS AT ANY POINT IN YOUR BABY’S DEVELOPMENT, CONTACT THEIR DOCTOR.

HIGHER RISK FOR DEVELOPING HEARING LOSS
★ A NICU stay longer than 5 days
★ In utero infections, including CMV, herpes, rubella
★ Head trauma
★ Disorders such as Huntington’s syndrome
★ Chemotherapy
★ Low birth weight
★ Head and face anomalies
★ Family history of hearing loss

CHILDREN WHO PASS THEIR NEWBORN HEARING SCREENING CAN DEVELOP HEARING LOSS AT ANY POINT AFTER BIRTH

UP TO 5% of children have HEARING LOSS by school age

THE IMPACT OF HEARING LOSS CAN BE REDUCED WHEN IDENTIFIED AND APPROPRIATE INTERVENTION IS PROVIDED EARLY

SOUTH DAKOTA DEPARTMENT OF HEALTH doh.sd.gov

NBS004 Revised 09-2022
If not addressed, **HEARING LOSS CAN LEAD TO**
delayed speech, language, and brain development, social isolation, reduced academic achievement, and more.

**Your Baby’s HEARING**

The following activities provide your child with a language rich environment

- ★ Read books out loud everyday
- ★ Use “baby-talk” with infant
- ★ Talk about what you are doing in everyday environments
- ★ Sing nursery rhymes
- ★ Build confidence with positive reinforcement
