The Health Behaviors of South Dakotans 2016

A Report of the South Dakota Behavioral Risk Factor Surveillance System

South Dakota Department of Health
600 East Capitol Avenue
Pierre, South Dakota 57501

In cooperation with
the Centers for Disease Control and Prevention
Atlanta, Georgia

February 2018

Copies of this report and its distribution were paid for by a grant from the Centers for Disease Control and Prevention.
Preface

The Health Behaviors of South Dakotans 2016 serves as a way to measure health risks of South Dakotans.

The information used to develop the report came from the Behavioral Risk Factor Surveillance System (BRFSS). The South Dakota Department of Health (DOH) initiated the BRFSS with help from the Centers for Disease Control and Prevention (CDC).

The survey consists of questions aimed at tracking and trending prevalence of health behaviors and conditions over time.

The BRFSS is the world’s largest telephone survey. The survey is administered to households with adults age 18 years or older.

The Office of Health Statistics edited and compiled data for this publication. This report contains as much information as practical from the survey.

For questions regarding The Health Behaviors of South Dakotans 2016, please contact:

Office of Health Statistics
615 East 4th Street
Pierre, South Dakota 57501-2536
Phone: (605) 773-3361

National web site: http://www.cdc.gov/brfss/

The following people were the main contributors to the development of this report:

Katie Hill Communications Coordinator
Carrie Cushing Policy Data Analyst
Mark Gildemaster Coordinator of South Dakota Behavioral Risk Factor Surveillance System
# Table of Contents

Preface ........................................................................... v  
List of Tables .................................................................. viii  
List of Figures ................................................................ xii  
Overview .......................................................................... 3  
Methodology .................................................................... 11  
Health Behavior Topics .................................................... 15  
  Overweight and Obesity .................................................. 17  
  Physical Activity ............................................................ 26  
  Tobacco Use .................................................................. 35  
  Diabetes ......................................................................... 51  
  Health Insurance ............................................................ 60  
  Breast and Cervical Cancer Screening ......................... 71  
  Cardiovascular Disease ................................................. 79  
  Colorectal Cancer Screening ......................................... 88  
  Immunization .................................................................. 91  
  Cancer ........................................................................ 100  
  Prostate Cancer ............................................................ 111  
  Asthma ......................................................................... 116  
  Arthritis ........................................................................ 119  
  Chronic Obstructive Pulmonary Disease ....................... 122  
  Depression .................................................................... 125  
  Kidney Disease ............................................................. 128  
  Vision Impairment ......................................................... 131  
  Seat Belt Use ................................................................. 134  
  Alcohol Use .................................................................. 137  
  Sleep ........................................................................... 146  
  General Health Status ................................................... 149  
  Sunblock Use ................................................................. 166  
  HIV/AIDS ...................................................................... 169  
  Caregivers ..................................................................... 172  
  Hearing Difficulty ........................................................ 179  
  Substance Abuse Treatment ........................................ 181  
  HPV Vaccination .......................................................... 183  
  Oral Health ................................................................... 185  
  Falls ........................................................................... 188  
Appendix A: Demographics ............................................ 193  
Appendix B: BRFSS Questionnaire ................................. 199
1. Estimated Percentage and Number of Persons at Risk Due to Selected Factors (Ages 18 and Older Unless Otherwise Specified): South Dakota BRFSS, 2016 ........5
2. Topics Covered on the South Dakota BRFSS, 2007-2016 ................................................. 6-7
3. Disposition of All Telephone Numbers in the Sample, 2016 .................................................. 13
4. Respondents Who Are Overweight or Obese, 2012-2016 ..................................................... 18
5. Respondents Who Are Class I-III Obese, 2012-2016 ............................................................. 21
8. Respondents Who Report Seven or More Exercise Trips Per Week, 2015-2016 ....................... 29-30
9. Respondents Who Are Sedentary 12 or More Hours Per Day, 2015-2016 .... 32-33
10. Respondents Who Currently Smoke Cigarettes, 2012-2016 ................................................. 36
11. Respondents Who Tried to Stop Smoking, Within the Past 12 Months, for One Day or Longer Because They Were Trying to Quit Smoking, 2011-2016 ......... 38
12. Percent of Current Cigarette Smoking by Type of Health Insurance, Ages 18-64, 2011-2016 .................................................................................................................. 38
13. Respondents Who Use Smokeless Tobacco, 2012-2016 ....................................................... 41
14. Respondents Who Currently Smoke E-Cigarettes, 2016 ...................................................... 44
15. Respondents Who Use Tobacco, 2016 ...................................................................................... 46
16. Respondents Who Have Heard of the QuitLine Program, 2013-2016 ................................. 49
17. Respondents Who Were Told They Have Diabetes, 2012-2016 ........................................... 52
18. Respondents, Ages 18-64, Who Do Not Have Health Insurance, 2012-2016 ............... 61
19. Type of Health Insurance, Ages 18-64, 2011-2016 ............................................................. 63
20. How Long Since Respondent Last Visited a Doctor for a Routine Checkup, 2011-2016 ......................................................................................................................... 63
23. Respondents Who Have Had a Routine Checkup Within the Past Two Years, 2012-2016........................................................................68-69
24. Female Respondents, Ages 40 and Older, Who Have Had a Mammogram in the Past Two Years, 2012-2016....................................................72
25. Female Respondents Who Had Cervical Cancer Screening in the Past Three Years, 2012-2016.................................................................75
26. Female Respondents Who Have Had an HPV Test Within the Past Three Years, 2016..................................................................................77
27. Respondents Who Previously Had a Heart Attack, 2012-2016..............80
28. Respondents Who Have Angina or Coronary Heart Disease, 2012-2016........83
29. Respondents Who Previously Had a Stroke, 2012-2016...........................................86
30. Respondents, Ages 50 to 75, Who Met Colorectal Cancer Screening Recommendations, 2012-2016 .................................................................88-89
32. Respondents, Ages 65 and Older, Who Have Had a Flu Shot Within the Past 12 Months, 2012-2016 ........................................................................92
33. Respondents, Ages 65 and Older, Who Have Had a Pneumonia Shot, 2012-2016.........................................................................................95
34. Respondents Who Have Had a Tetanus Shot Since 2005, 2013-2016.........97-98
35. Respondents Who Have Ever Been Diagnosed With Cancer (Excluding Skin Cancer), 2012-2016.................................................................100-101
36. Type of Cancer Respondents Have Been Diagnosed With, 2015-2016........103
37. Respondents’ Treatment for Cancer, 2016.........................................................103
38. Type of Doctor Providing a Majority of Health Care for Respondents With Cancer, 2016.................................................................103
62. Hours Per Week Care Has Been Provided, 2016 ..................................................174
63. Type of Health Condition, 2016 ..........................................................................174
64. Types of Support Services For Caregivers, 2016 ..................................................176
65. Respondents Who Provide Fulltime, Regular Care to a Friend or Family Member, 2016 ........................................................................................................177-178
66. Respondents Who Are Deaf or Have Serious Difficulty Hearing, 2016 .......... 179-180
67. Respondents Who Have Been or are Currently Being Treated for Substance Abuse, 2016 ........................................................................................................181-182
68. Respondents, Ages 18 to 49, Who Have Ever Had an HPV Vaccination, 2016 ........................................................................................................183-184
69. Respondents Who Have Visited a Dentist or Dental Clinic for Any Reason Within the Past Year, 2012-2016 .................................................................186
71. Demographics of Survey Respondents, 2016 .......................................................193
72. Surveys Completed by Resident County, 2016 .......................................................194-195
List of Figures

1. Percent of Respondents Who Are Overweight or Obese Based on Body Mass Index, 1993-2010 ................................................................. 17
2. Percent of Respondents Who Are Overweight or Obese Based on Body Mass Index, 2011-2016 ................................................................. 17
3. Percent of Respondents Who Are Class I-III Obese Based on Body Mass Index, 1993-2010 ................................................................. 20
4. Percent of Respondents Who Are Class I-III Obese Based on Body Mass Index, 2011-2016 ................................................................. 20
5. Percent of Respondents Who Are Class II-III Obese Based on Body Mass Index, 2002-2010 ................................................................. 23
9. Respondents Who Report Seven or More Exercise Trips Per Week, 2015-2016 ................................................................. 29
10. Respondents Who Are Sedentary 12 or More Hours Per Day, 2015-2016 ................................................................. 32
13. Percent of Smokers Who Have Been Advised by a Doctor, Nurse, or Other Health Professional to Quit Smoking in the Past 12 Months, 2011-2016 ................................................................. 38
14. Respondents’ Place of Work Smoking Policy, 2012-2016 ................................................................. 39
17. Percent of Respondents Who Use Smokeless Tobacco, 2011-2016 ................................................................. 40
18. Percent of Respondents Advised to Quit Using Smokeless Tobacco by a Doctor, Nurse, or Other Health Professional, 2011-2016 ................................................................. 43
