Induced Abortion

According to South Dakota Codified Law chapter 34-23A, physicians are required to submit to the Department of Health the Report of Induced Abortion Form, a Voluntary and Informed Consent Form for all abortions, and a Parental Notice Form where applicable. The forms are provided at the end of the report.

An Overview: 2022

Total Induced Abortions Performed in South Dakota	137
Total Induced Abortions Performed in South Dakota on South Dakota Residents	123

Patient Information

There were 137 abortions performed in South Dakota in 2022, down from 192 abortions in the previous year.

Of the 137 abortions performed in South Dakota, 123 (90%) were performed on South Dakota residents. Table 1, below, provides the residence and age breakdown for the abortions performed in South Dakota.

**Table 1
Induced Abortions Occurring in South Dakota by State of Residence and Age, 2022**

	Total	Age					
		0-17	18-19	20-24	25-29	30-34	35+

Source: South Dakota Department of Health, Office of Health Statistics

Table 2, below, shows the breakdown of abortions by county of residence and Table 3, on the next page, shows the breakdown of abortions by city of residence for 2022.

NOTE: To protect the privacy of the pregnant mother, only counties or cities with at least 10 events are included in each table.

**Table 2
South Dakota Resident Induced Abortions Occurring in South Dakota by Resident County, 2022**

Table 70, below, indicates that pregnant mothers in the 20-24 and 25-29 age groups comprised the largest percentage of the induced abortions occurring in South Dakota.

This is also true for induced abortions occurring in South Dakota to South Dakota residents.

Table 4
Induced Abortions Occurring in South Dakota by Residence and Age, 2022

Mothers' Age	Occurring in South Dakota		South Dakota Residents	
	Number	Percent	Number	Percent
0-17	5	3.6	3	2.4

40+	2	1.5	1	0.8
Total	137	100	123	100

Source: South Dakota Department of Health, Office of Health Statistics

Table 5, below, indicates that of the abortions that occurred in South Dakota, 61.8 percent were white, non-Hispanic, 11.1 percent were black, non-Hispanic, 10.3

percent were American Indian, non-Hispanic, 5.9 percent were Asian, non-Hispanic, and 8.1 percent were Hispanic.

Table 5
Induced Abortions Occurring in South Dakota by Age and Race, 2022

Age	Mother's Race					
	White, non-Hispanic	Black, non-Hispanic	American Indian, non-Hispanic	Hispanic	Asian, non-Hispanic	Multi-race, non-Hispanic
Number	84	15	14	11	8	4
Percent	61.8	11.0	10.3	8.1	5.9	2.9
0-17	4	0	1	0	0	0
18-19	3	1	2	0	0	0
20-24	27	5	7	5	5	2
25-29	23	2	2	4	0	1
30-34	15	4	2	1	1	1
35-39	11	3	0	0	2	0
40 +	1	0	0	1	0	0

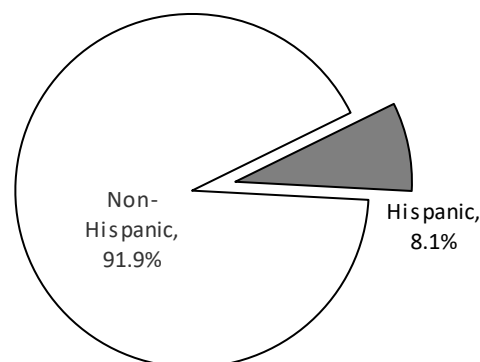

Source: South Dakota Department of Health, Office of Health Statistics

Note: Failure of races to add to the total is due to unknown races.

Figure 1, to the right, illustrates that most of the pregnant mothers, 91.9 percent, were non-Hispanic. South Dakota's population consists of 8.1 percent Hispanic women age 15 to 44 based on the 2021 U.S. Census estimates.

Table 6, below, shows the education and marital status of the pregnant mothers. Considering marital status, 82.5 percent of the 137 pregnant mothers who received induced abortions in South Dakota were not married.

Figure 1
Induced Abortions Occurring in South Dakota by Ethnicity, 2022

Table 6
Induced Abortions Occurring in South Dakota by Education and Marital Status, 2022

Education of Mother	Marital Status					
	Total		Single		Married	
	Number	%	Number	%	Number	%
	137	100	113	82.5	24	17.5
High School Graduate or Less	65	100	55	84.6	10	15.4
Some College, but No Degree	41	100	36	87.8	5	12.2
Vo-Tech, Teacher's Certificate, Associate Degree/Bachelor's Degree/Master's Degree/Doctorate	30	100	21	70.0	9	30.0

Note: Failure to add to total is due to unknown education.
Source: South Dakota Department of Health, Office of Health Statistics

Payment Information

The Report of Induced Abortion Form asks questions about how much the abortion cost and who paid for the abortion. Table 7, on the next page, indicates that in 2022, 81.8 percent of all abortions performed in South Dakota were self-pay while 16.8 percent were paid by private insurance and 1.5

percent were paid by public health plans. Of the 25 abortions paid by private insurance or a public health plan, 24 were paid by a fee-for-service insurance company, and 1 was paid by a managed care insurance company.

Table 7
Induced Abortions Occurring in South Dakota by
Payment and Insurance Coverage Type, 2022

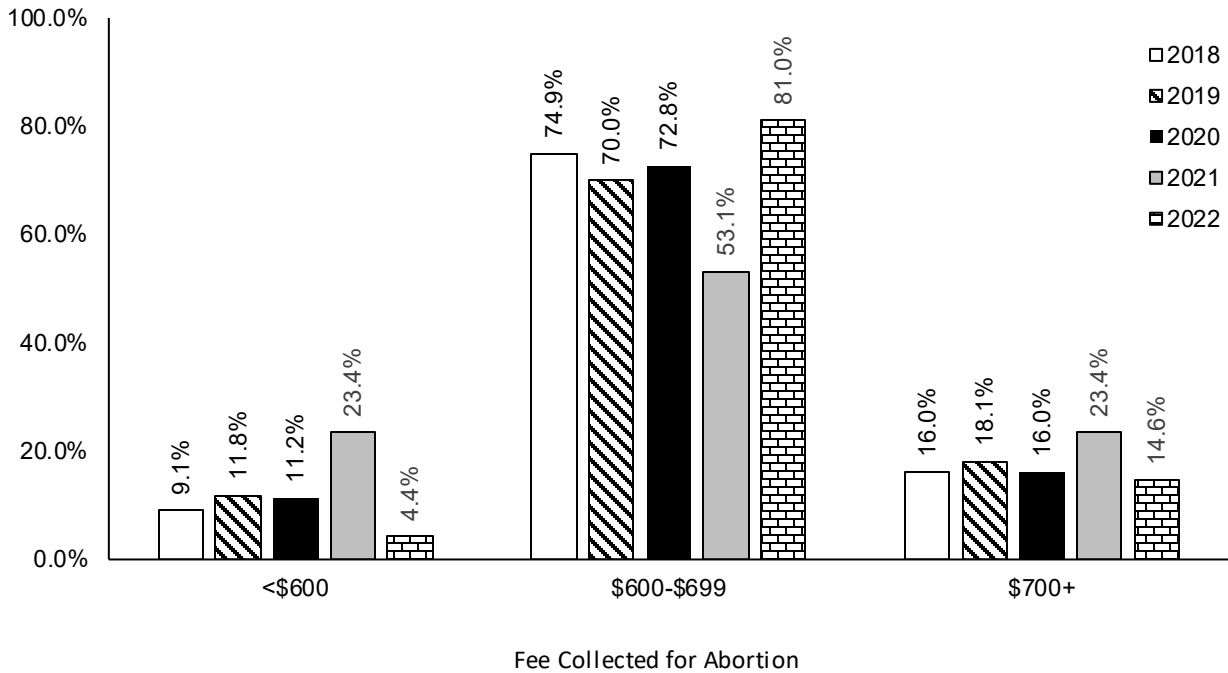

Payment Source	Total	Fee-for-service Insurance Co.	Managed Care Company	No Insurance Used
Private Insurance	23	23	0	0
Public Health Plan	2	1	1	0
Self Pay	112	0	0	112
Total	137	24	1	112

Source: South Dakota Department of Health, Office of Health Statistics

In 2022, the majority of abortions, 81.0 percent, cost between \$600 and \$699.

Figure 2, below, displays a comparison of the fees for abortions for each year from 2018 to 2022.

Figure 2
Percent of Induced Abortions Occurring in South Dakota by Fee Collected for Abortion, 2018-2022

Source: South Dakota Department of Health, Office of Health Statistics

Previous Pregnancies

The Report of Induced Abortion Form also includes a series of questions about previous pregnancies. Figure 3, on the next page, illustrates the number of children now living reported by the pregnant mothers who received abortions in South Dakota for the past five years.

Of the pregnant mothers reporting in 2022, 43.1 percent reported having no living children. Less than one percent had one or more live births that are now deceased.

Figure 3
Percent of Induced Abortions Occurring in South Dakota by the Number of Pregnant Mother's Children Who are Now Living, 2018-2022

Source: South Dakota Department of Health, Office of Health Statistics

Figure 4, below, indicates that 11.7 percent of pregnant mothers had a spontaneous termination in the past. For this report, a spontaneous termination is defined as a termination in which the process starts of its

own accord through natural causes. Most pregnant mothers, 88.3 percent, who obtained induced abortions in 2022 reported they had never had a spontaneous termination.

Figure 4
Percent of Induced Abortions Occurring in South Dakota by Previous Spontaneous Terminations, 2018-2022

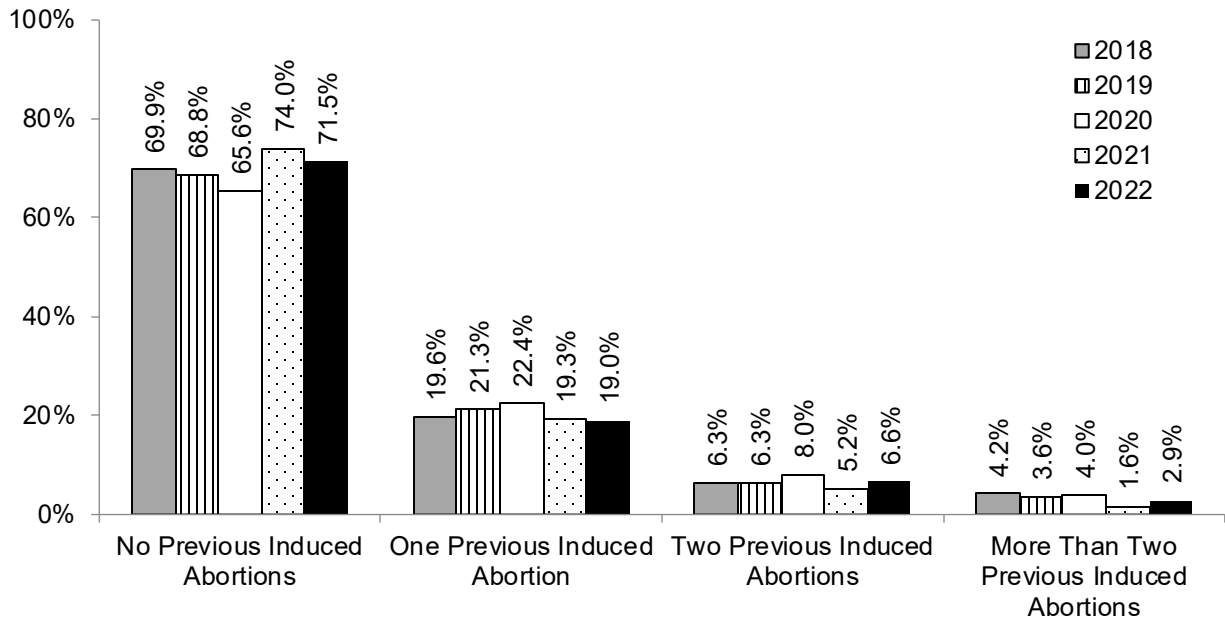

Source: South Dakota Department of Health, Office of Health Statistics

Figure 5, below, illustrates the number of previous induced abortions reported by the pregnant mother. An induced abortion is

statutorily defined as the intentional termination of the life of the human being in the uterus.

Figure 5
Induced Abortions Occurring in South Dakota by Previous Induced Abortions, 2018-2022

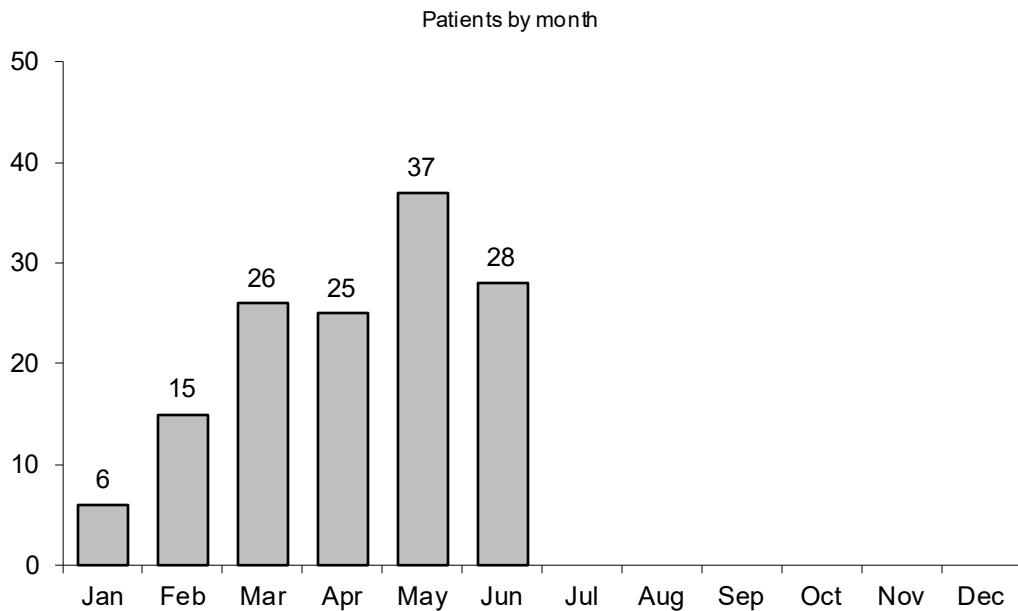

Source: South Dakota Department of Health, Office of Health Statistics

As seen in Figure 5, above, most pregnant mothers, 71.5 percent, reported that they had no previous induced abortions. In 2022, 19.0 percent had obtained one previous induced abortion and 9.5 percent had obtained more than one previous induced abortion.

Medical Information

The Report of Induced Abortion Form also asked a series of questions aimed at obtaining medical information. Figure 6, on the next page, lists the number of induced abortions performed in South Dakota during 2022 by month of occurrence. The fewest numbers of abortions were performed in January while the greatest occurred in June.

Figure 6
Induced Abortions Occurring in South Dakota by Month of Abortion, 2022

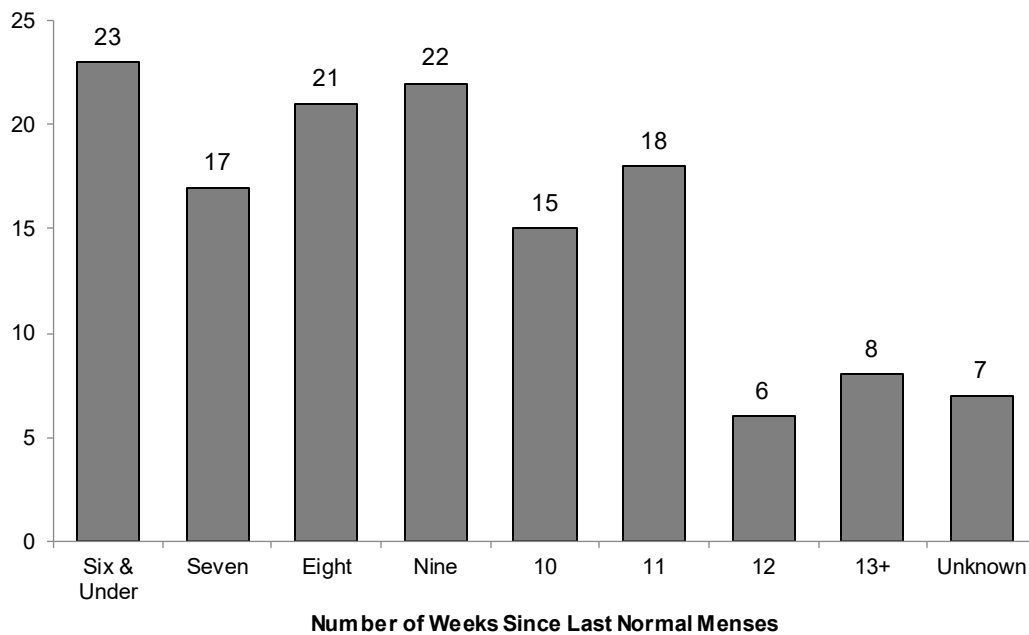

Source: South Dakota Department of Health, Office of Health Statistics

Figure 7, below, shows the number of weeks between the date the last normal menses began and the abortion date. Most of the

pregnant women, 98, reported that their last normal menses began within 10 weeks prior to the induced abortion date.

Figure 7
Induced Abortions Occurring in South Dakota
by Number of Weeks Since Last Normal Menses Began, 2022

Source: South Dakota Department of Health, Office of Health Statistics

Figure 8, below, shows the number of induced abortions occurring in South Dakota from 2018 to 2022 by the clinical estimated weeks of gestation.

The largest percentage of pregnant mothers in 2022, 28.5 percent, received abortions at seven to eight weeks of estimated gestation.

Figure 8
Induced Abortions Occurring in South Dakota by
Approximate Gestational Age, 2018-2022

Source: South Dakota Department of Health, Office of Health Statistics

Figure 9, below, lists the number of induced abortions occurring in South Dakota by the weight of the fetus. The category with the largest number of occurrences was the 50 to

74-gram category with 16 induced abortions. That is equivalent to approximately 1.8 to 2.6 ounces.

Figure 9
Induced Abortions Occurring in South Dakota by Weight of Fetus, 2022

Note: One gram equals approximately 0.0353 ounces or one ounce equals approximately 28.3 grams.
 Source: South Dakota Department of Health, Office of Health Statistics

Table 8, to the right, illustrates the number of abortions that were performed with the knowledge that a fetal abnormality existed. Of the abortions performed in 2022, three of the forms indicated that there was a fetal abnormality present at the time of the abortion. Most of the forms indicated that it was unknown if a fetal abnormality was present at the time of the abortion.

Table 8
Induced Abortions Occurring in South Dakota by Fetal Abnormality, 2022

Presence of Fetal Abnormality	Number	Percentage
Yes	3	2.2
No	0	0.0
Unknown	134	97.8
Total	137	100%

Source: South Dakota Department of Health, Office of Health Statistics

Table 9
Induced Abortions Occurring in South Dakota by Method of Disposal, 2022

Method of Disposal	Number	Percentage
Incineration	86	62.8
Unknown/Medical	51	37.2
Total	137	100%

Source: South Dakota Department of Health, Office of Health Statistics

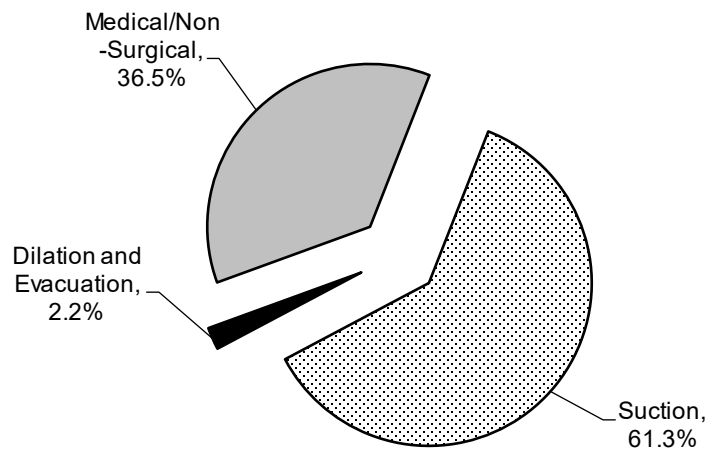

Table 9, to the left, indicates the method used to dispose of the fetus in 2022. The main method of disposal in 2022 was incineration with 86 or 62.8 percent.

Termination Procedure

The Report of Induced Abortion Form also asked questions about the termination procedure. Figure 10, to the right, illustrates the primary procedures used to perform induced abortions in South Dakota in 2022.

In 2022, suction was used for 61.3 percent of the abortions while 36.5 percent of the abortions used medical/non-surgical.

Figure 10
Induced Abortions Occurring in South Dakota by Primary Procedure Used, 2022

Source: South Dakota Department of Health, Office of Health Statistics

Table 10, to the right, indicates additional procedures that were used to terminate the pregnancy in 2022. No abortions required an additional procedure in 2022. There was one case of a maternal complication reported to the Department of Health in 2022.

Table 10
Induced Abortions Occurring in South Dakota by
Any Additional Procedures Used, 2022

Additional Procedures Used	Number	Percentage
No Additional Procedure	137	100%

Source: South Dakota Department of Health, Office of Health Statistics

Figure 11
Induced Abortions Occurring in South Dakota
by Type of Anesthetic Used, 2022

Source: South Dakota Department of Health, Office of Health Statistics

Figure 11, to the left, illustrates the type of anesthetic used for abortions performed in South Dakota. In 2022, 61.3 percent of pregnant mothers were given a local anesthetic while 2.2 percent were given a general anesthetic. Pregnant mothers who received no anesthetic made up 36.5 percent.

Reason for the Induced Abortion

The Report of Induced Abortion Form asked a question about the reason for the induced abortion. Table 11, on the next page, illustrates the reasons that pregnant mothers had induced abortions from 2018 to 2022. The mother did not desire to have the child has been the highest response for all five years.

The mother could not afford the child has been the second highest response for all five years. In 2022, 39.4 percent of pregnant mothers gave more than one response while in 2021, 44.3 percent of pregnant mothers gave more than one response.

Table 11
Induced Abortions Occurring in South Dakota by Reason for Abortion, 2018-2022

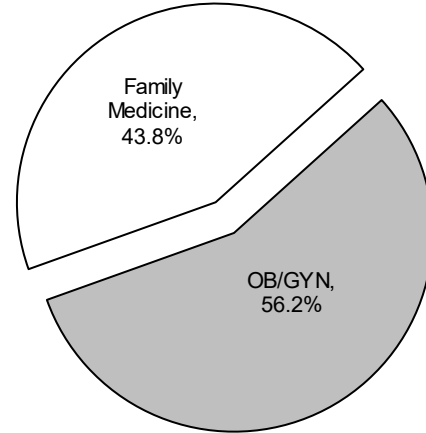

Reason for Induced Abortion	2018		2019		2020		2021		2022	
	Number	Percent	Number	Percent	Number	Percent	Number	Percent	Number	Percent
The mother did not desire to have the child	244	63.9%	290	70.0%	88	70.4%	132	68.8%	89	65.0%
The mother could not afford the child	198	51.8%	200	48.3%	63	50.4%	89	46.4%	67	48.9%
The mother's emotional health was at risk	65	17.0%	86	20.8%	22	17.6%	44	22.9%	32	23.4%
The mother would suffer substantial and irreversible impairment of a major bodily function if the pregnancy continued	8	2.1%	15	3.6%	4	3.2%	6	3.1%	4	2.9%
The pregnancy was a result of rape or incest	4	1.0%	8	1.9%	0	0.0%	6	3.1%	1	0.7%
Other	70	18.3%	70	16.9%	16	12.8%	33	17.2%	15	10.9%

Note: Percentages do not add to 100 because multiple reasons can be given.
Source: South Dakota Department of Health, Office of Health Statistics

Physician Specialty Information

Figure 12, to the right, illustrates the specialty of the physicians who performed abortions in South Dakota in 2022. Most abortions were performed by an obstetrician gynecologist. During the 2022 reporting period, none of the physicians who performed induced abortions in South Dakota had their license revoked or suspended or had been subject to other professional sanctions.

Figure 12
Induced Abortions Occurring in South Dakota by Physician's Specialty, 2022

Voluntary and Informed Consent Form

Of the 137 report forms received by the South Dakota Department of Health for induced abortions performed in 2022, 137 indicated that patients received the required disclosures.

Source: South Dakota Department of Health, Office of Health Statistics

The Voluntary and Informed Consent form is used to collect data regarding informed consent information supplied to abortion patients. There were a total of 157 Voluntary and Informed Consent forms received. Of those, 137 indicated that the pregnant mother went on to obtain the induced abortion while 20 did not have the procedure.

The data showed that of the 157 Voluntary and Informed Consent forms received, 141 received the medical information in person. Of the 157 forms that were received, 138 indicated that the medical information was provided by the physician performing the induced abortion and three received this information from a referring physician. Physicians performing the abortion supplied 145 of the pregnant mothers with the resource information. Three reported receiving the information from a referring physician. A total of 144 pregnant mothers reported receiving the resource information by telephone and four reported receiving the information in person.

Of the 157 forms received, 147 indicated that the pregnant mother was offered the printed materials on public and private assistance agencies. It was reported that two pregnant mothers accepted this information, while 145 did not accept the information. Of the 157 forms received, 147 indicated that the pregnant mother was offered the Fetal Growth and Development Booklet. It was reported that two accepted this information,

while 145 did not accept the information. Of the 157 forms received, 147 indicated that the pregnant mother was offered the DOH website address for "Information on Fetal Development, Birth, Abortion and Adoption". It was reported that three pregnant mothers accepted this information, while 144 did not accept the information.

Of the 157 forms received, 155 indicated that the pregnant mother was offered the opportunity to view the sonogram. Of these, 85 accepted the opportunity to view the sonogram, while 70 did not accept the opportunity to view the sonogram. Of the 157 forms received, 154 indicated the pregnant mother was offered the opportunity to hear the heartbeat of the unborn child. It was reported that 49 pregnant mothers accepted the opportunity to hear the heartbeat, while 106 did not accept the opportunity to hear the heartbeat.

Parental Notice

Of the five Parental Consent forms received, five indicated the pregnant mother was an unemancipated minor. Four forms indicated notice was given to the pregnant mother's parent or guardian. One form indicated the parent or guardian was not notified, and a judge authorized the physician to perform the induced abortion. All five minor pregnant mothers went on to have the induced abortion.

REPORT OF INDUCED ABORTION
South Dakota Codified Law §§ 34-23A-35, 34-23A-34, 34-23A-19
(also 45 C.F.R. §§ 164.512(b)(1)(i) and 164.514(e)(3)(i))
South Dakota Department of Health
Office of Health Statistics
615 East 4th Street
Pierre, South Dakota 57501-2536

If the unborn child was deemed capable of experiencing pain, did the method of abortion provide the best opportunity for the unborn child to survive? <input type="checkbox"/> Yes <input type="checkbox"/> No		
If such a method was not used, what was the basis of the determination that termination in that manner would pose a greater risk either of the death of the pregnant woman or of the substantial and irreversible physical impairment of a major bodily function, not including a psychological or emotional condition, of the woman than other available methods? _____		
Was the infant born alive? <input type="checkbox"/> Yes <input type="checkbox"/> No If Yes, what medical action was taken to preserve the life of the infant? _____ Did the infant survive? <input type="checkbox"/> Yes <input type="checkbox"/> No Location of death? _____		
REASON FOR INDUCED ABORTION		
Primary Procedure That Terminated Pregnancy <i>(check only one)</i> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Type of Termination Procedure Suction Medical/Non-surgical Dilation and Evacuation Intra-uterine Instillation Sharp Curettage Hysterotomy/Hysterectomy Other (Specify)	Any Additional Procedures Used <i>(check all that apply)</i> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
Type of Anesthetic Used: <input type="checkbox"/> None <input type="checkbox"/> General <input type="checkbox"/> Regional <input type="checkbox"/> Local <input type="checkbox"/> IV Conscious Sedation	Maternal Complications from the Abortion: <input type="checkbox"/> None 1. _____ 2. _____ 3. _____	
REASON FOR INDUCED ABORTION		
Check the boxes that best describe the patient's reason: <input type="checkbox"/> The mother would suffer substantial and irreversible impairment of a major bodily function if the pregnancy continued <input type="checkbox"/> The pregnancy was the result of rape <input type="checkbox"/> The mother could not afford the child <input type="checkbox"/> The mother's emotional health was at risk <input type="checkbox"/> The pregnancy was a result of incest <input type="checkbox"/> The mother did not desire to have the child <input type="checkbox"/> Other, which shall be specified: _____
